

# THE MAGICAL WORLD OF

## EPIC CARD GAME

### COUNTERS

Some of the cards in various sets make reference to different types of “Counters”. “Sleep”, “Time”, “Vitality”, or “Door” to name a few. The intent is simply to place anything on a card to remind you of some special temporary circumstance affecting the game. Coins, stones, even paper clips will do the trick. But as I have been expanding the game, the number of different counters has already reached over twenty.

Here is a set of counters that are designed to be 1” discs for you to use while playing my game.

1. Print the page with the counters you need on the heaviest card stock your printer can manage.
2. If desired, the counters will last longer if you laminate both sides with clear contact paper found in most home improvement stores.
3. You can cut the counters into 1” squares or use a sturdy 1” round craft punch. (I use the Martha Stewart brand 1” punch.)

You can also submit individual pre-formatted pages to be print from Superior POD.

I will update these files as needed. Have fun!
